Experience (From most recent to oldest)

Frontend Developer
Sinaptia – Development Company | *Sep 2019 – Aug 2025*

Sinaptia works primary with Ruby on Rails. I joined as the main **frontend specialist**, implemented and maintaining **responsive, accessible, and performant UIs** using modern JavaScript frameworks (like React). Led **migrations of legacy interfaces**, built **scalable frontend architectures**, and collaborated closely with backend developers to integrate APIs and optimize data flow. Also contributed to backend tasks in Ruby on Rails when needed.

Projects

Omnially *(2 years)*
- Migrated a tool that build dynamic interfaces using widgets from jQuery and vanilla JS to React and Redux.
- Contributed to the backend (Ruby on Rails) to lesser extent.

DHNN - Chewchoo *(7 months)*
- Website from scratch using Ruby on Rails, React, Tailwind.
- The challenge was implemented complex animations without appeal to high resource demanded options.

Free the Frela *(6 months)*
- Built a website from scratch that connect contractors with freelancers. That use Ruby on Rails, Rails components, Tailwind.

- Provided a custom script to automatically generate multiple versions of the same image in different sizes.

Organise *(3 months)*
- Collaborated with the team migrating the site to NextJS

Alliants *(2 years and 8 months)*
- Developed a static generated site with Gatsby and Strapi CMS from scratch. The site was prepared to be a template that have dynamic styles and the clients can customise it.
- Helped to improve a large code base, optimised it and extend the current documentation with the new additions.

Extra activities in the company

- Provided assistant and help to the rest of the team when they need it, even when I didn't work with that project. This can be code review or just advice.
- Mentoring junior developers, promoting best practices across the team
- I have been holding brief workshops and delivering small classes talks on frontend topics.
- I have been holding meetings where everyone can talk about a topic, like new tools, difficult challenge recently overcome, etc.
- Participated in the investigation on how use IA in the company to improve productivity.
- Take tech interviews for new Frontend Developers

Developer - IT Assistant
Autodetail | *Nov 2016 – Aug 2019*

- Equipped the office to be used for the internal marketing team.
- Built a WordPress website.
- Provided a software to automate different tasks like book appointments or a certificate generator.
- Developed and maintained the company website.

Fullstack developer
GBPintura | *Aug 2018*

- Get up running server, Google Analytics and the site using a template on WordPress

Skills

Frontend

HTML	Expert	CSS	Expert
Javascript	Expert	Tailwind	Expert
Stimulus	Intermediate	Sass	Expert
React	Expert	Less	Expert
